SUMMARY:

A passionate and full-stack developer in **Next.js** and **React.js**. With a strong foundation, I am eager to contribute my skills to DYNAMIC teams, assisting startups in rapidly launching MVPs, supporting agencies in scaling creative digital projects, and helping enterprises develop robust, secure frontend solutions. I bring expertise in clean architecture, responsive design, and optimized performance to create seamless, high-quality user experiences across diverse projects.

SKILLS:

Programming: JavaScript, TypeScript, Python

Web Development: React.js, Next.js, Redux Toolkit, Zustand, React Context API, React Hooks, Framer Motion, Tailwind CSS, Material UI, Shadcn.

UI/UX & Design: Figma, Canva

Backend & DevOps & Database: Node.js, Express.js, Firebase, REST APIs, Docker, Git, MongoDB, MySQL, Prisma

PROJECTS:

Car Dealer: A modern, full-stack platform for browsing, filtering, and managing car listings with seamless performance and interactive features. [Github](#)

- Built with **Next.js 15** and **TypeScript**, featuring smooth UI interactions by **Framer Motion** and Shadcn UI components. Integrated NextAuth for secure authentication, role-based access, and a scalable database structure.
- Used **AWS S3** for media storage, **TinyMCE** for rich text car descriptions, and **Zod + REACT HOOK FORM** for safe, schema-based form handling.
- Implemented **Debounce** for optimized input performance, **Nuqs** for URL-based filters and state persistence, and **Recharts** to visualize analytics like views, interest trends, and sales metrics.

Airbnb Clone:

[Github](#)

- A full-stack Airbnb-inspired web app using **Next.js** and **TypeScript**, with Tailwind CSS for responsive styling.
- Database management via **Prisma ORM** Implemented authentication with Next-Auth and **MongoDB** for storing user and property data.
- Implemented advanced search filters using **react-select**, **react-date-range**, and **query-string**, with a smooth user experience enhanced by REACT HOT TOAST.
- **Leaflet.js** for interactive map displays and Cloudinary for image uploads, Utilized **Zustand** for state management
- **React Hook Form** for seamless form handling, ensuring a smooth user experience.

Job Portal: A dynamic job portal for job seekers to browse and apply for job listings and for employers to post and manage job opportunities. [Github](#)

- Developed a responsive frontend using **React**, **Vite**, Tailwind CSS, and **Framer Motion**, with seamless routing via React Router and theme support using **next-themes**.
- Managed complex global state with **Redux Toolkit** and integrated secure authentication and authorization using **JWT**, **bcrypt**, and cookies.
- RESTful APIs with **Express.js** and **MongoDB**, handling file uploads via Multer and **Cloudinary** for image management.

And [many more](#)...

EDUCATION:

Bachelor of Business Administration

National University, Bangladesh

2017–2023 (Left to pursue career opportunities in software development)

Future Ambition: Build career in Machine Learning and Data Science.
