SUMMARY:

A passionate and results-driven full-stack developer specializing in Next.js, React.js, and modern web technologies. With a strong foundation in both front-end and back-end development. I am eager to contribute my skills to dynamic teams, assisting startups in rapidly launching MVPs, supporting agencies in scaling creative digital projects, and helping enterprises develop robust, secure frontend solutions. I bring expertise in clean architecture, responsive design, and optimized performance to create seamless, high-quality user experiences across diverse projects.

SKILLS:

Programming: JavaScript, TypeScript, Python

Web Development: React.js, Next.js, Redux Toolkit, Zustand, React Context API, React Hooks, Framer Motion, Tailwind CSS, Material UI, Shadcn, Deployment

UI/UX & Design: Figma

Backend & APIs: Node.js, Express.js, Firebase, REST APIs

Database Systems: MongoDB, MySQL, Prisma

Cloud & DevOps: Docker, Git.

PROJECTS:

Car Dealer: A modern, full-stack platform for browsing, filtering, and managing car listings with seamless performance and interactive features.

- Built with **Next.js 15**, **TypeScript**, and Tailwind CSS, featuring smooth UI interactions powered by Framer Motion and **Shadcn UI** components.
- Integrated **NextAuth** with **Prisma** for secure authentication, role-based access, and a scalable database structure.
- Used AWS S3 for media storage, **TinyMCE** for rich text car descriptions, and **Zod + React Hook Form** for safe, schema-based form handling.
- Implemented debounce for optimized input performance, **nuqs** for URL-based filters and state persistence, and **Recharts** to visualize analytics like views, interest trends, and sales metrics.

Airbnb Clone:

- Built a full-stack Airbnb-inspired web app using **Next.js**, **React**, and **TypeScript**, with Tailwind CSS for responsive styling.
- Implemented authentication with Next-Auth, database management via **Prisma ORM**, and **MongoDB** for storing user and property data.
- Implemented advanced search filters using **react-select**, **react-date-range**, and **query-string**, with a smooth user experience enhanced by React Hot Toast and **React Hook Form**.
- **Leaflet.js** for interactive map displays and Utilized **Cloudinary** for image uploads
- Utilized **Zustand** for state management and React Hook Form for seamless form handling, ensuring a smooth user experience.

Job Portal: A dynamic job portal for job seekers to browse and apply for job listings and for employers to post and manage job opportunities.

- Developed a responsive frontend using **React**, **Vite**, Tailwind CSS, and **Framer Motion**, with seamless routing via React Router and theme support using next-themes.
- Managed complex global state with **Redux Toolkit**, integrated secure authentication and authorization using **JWT**, **bcrypt**, and cookies.
- Built RESTful APIs with **Express.js** and MongoDB, handling file uploads via Multer and **Cloudinary** for image management.
- Implemented modern UI interactions with **Shadcn UI**, Lucide Icons, and Sonner for real-time notifications.

AI Presentation Builder: A cutting-edge web application that leverages AI to automate slide creation with dynamic UI/UX.

- Built with **Next.js 15**, **React 19**, and Tailwind CSS for a seamless, responsive UI
- Integrated **OpenAI** and **Google Generative AI APIs** to generate context-aware presentation content
- Implemented **Clerk Auth**, **Prisma**, and **Zod** for secure user management and data validation
- Utilized **Zustand** for state management, Recharts for data visualization, and Uploadcare for media handling.

And many more...

EDUCATION:

Bachelor of Business Administration (Honours)
National University, Bangladesh
2017–2023 (Left to pursue career opportunities in software development)

Future Ambition:

Build a career in **Machine Learning** and **Data Science**, using my strong background in full-stack development as a technical advantage.
